

Technical rider for:

Ghost in the Machine

- Mixer must be a **Pioneer DJM-900NXS2**, DJM-750MK2 or DJM-V10.
- Allen & Heath Xone mixers are **not** acceptable.
- Four **Pioneer CDJ-3000** or Pioneer CDJ-2000NXS2 USB/media players. No older models.
- All players must be updated to the latest firmware and be serviced/tested before the event.
- All players must be linked via a network hub/switch.
- Place two monitor speakers **at ear level**, left and right of the DJ. Monitor signal **must** be stereo.
- Floor monitors are **never** acceptable.
- Volume for the monitor speakers **must** be adjustable **by the DJ** on the mixer.
- The table for the equipment must be at least 100cm (40 inches) high.
- Leave the 'record out' on the DJM available for the DJ's own recording device.
- No other DJ or live acts on the event can set up in the same immediate space during the set.
- Do **not** record the set unless agreed to with the booking agency **before** the show.

If your organization is unable to provide any of these items, facilities, specific models or anything else, please contact the booking agency to discuss possible alternatives.
